User Information

Christian, 30 yr | Digital Designer
Miguel, 60 yr | Sales Representative
Bryan, 21 yr | Student

User Task:

Log in app, search for Flushing apt with 3bd, 2br in a building and email the realtor.

Behaviors + Solution

Problem: Search tab was not sure if automatically search, user was confused.
Solution: Add the glass search icon at the end and make it as a button.

Problem: When filling out the form or log in section theres no direction on whats active for the user.
Solution: Add a curser at the end of the name so it is more realistic for the form to be filled out.

Problem: User did not slide up on to see the deatils for the listing. Instead they will Tap and expect to take to another page.
Solution: Make transition slide right and with an action to tap.

Problem: Colors were too bright on the phone version and it bother user eyesight.
Solution: Change slightly color palette to make the colors more pastelle so there are not too strong on the eyes.

Problem: The small map in the detail section for the listing of the homes will be link where to the main page or google map?
Solution: Have a section label to get diredctions and google map so that it links to open to the google map app.
